

CROP STARTER

INCREASE FERTILISER UPTAKE + REDUCE FUNGAL DISEASE

Manufactured by:
Switch Innovation Pty Ltd
Sydney Road
Cowra NSW 2794
Email: admin@switchinnovation.com.au

CROP	LITRES/HA
Cereals	5-10
Canola & Pulses	5-10
Cotton	10-20
Maize & Sweet Corn	10-20

Typical Analysis:

N5%, P8%, K3%
Beneficial Biology,
Trace Minerals, Amino Acid,
Humates, Kelp, Molasses,
Mycorrhizal Fungi (VAM),
Water

Apply via liquid inject, boom, fertigation or aerial.
Dilute with 70 - 100 litres of water/HA

For Best Results: Apply to soil at or prior to planting or liquid inject with the seed. Apply in overcast conditions where possible.

Follow up application mid season with SWITCH INNOVATION foliar liquids.

Compatibility: Compatible with a range of pesticides. Always conduct a 'jar test' when mixing with chemicals prior to application. Caution needs to be taken when mixing with herbicides as potential crop damage could occur. Thoroughly decontaminate tanks and spray equipment before use particularly before applying to sensitive crops. Clean the entire sprayer system, not just the tank.

Storage: Avoid exposure to direct sunlight and store in a cool dry place for a 2 year shelf life.
