

K20 POTASSIUM INFUSED ALCOHOL

Foliar Fertiliser Ingredients: 3% Nitrogen; 22% Potassium; organic alcohol; wetting agents; water.

Storage: Avoid exposure to direct sunlight and store in a cool dry place for a 2 year shelf life.

Compatibility: Compatible with a range of pesticides and soluble fertilisers. Always conduct a 'jar test' when mixing with chemicals prior to application.

For Best Results: Dilute with 150L + water per HA and use a non-ionic wetter e.g. Agral 600.

Caution needs to be taken when mixing with herbicides as potential crop damage could occur. Thoroughly decontaminate tanks and spray equipment before use.

For further information refer to the MSDS on our website. Switch Innovation's responsibility for the product sold is subject to the terms and conditions of sale, a copy of which is available upon request.

MADE IN AUSTRALIA

CROP	LITRES per HA	No. of APPLICATIONS	TOTAL L per HA	FOLIAR APPLICATION TIMING
COTTON	2	2	4	At flowering and again prior to plant stress event.
CANOLA	3	1	3	At flowering.
FRUIT & NUT TREES	2 - 4	2	4 - 8	At flowering and again prior to plant stress event.
