Manufactured by:
Switch Innovation Pty Ltd
Sydney Road
Cowra NSW 2794
Email: admin@switchinnovation.com.au

CROP	LITRES/HA
Canola	8-10
Cotton	10-15

Typical Analysis:

Total N 3% | K 21%

Trace Minerals, Microorganisms,
Plant Stimulants, Kelp,
Syrup, Filtered Water

Apply from stem elongation to 10% flower via boom or aerial.
Dilute with 40-100L water per HA

For Best Results: Apply at the commencement of flowering. Apply in overcast conditions where possible.

Compatibility: Compatible with a range of pesticides. Always conduct a 'jar test' when mixing with chemicals prior to application. Caution needs to be taken when mixing with herbicides as potential crop damage could occur. Thoroughly decontaminate tanks and spray equipment before use particularly before applying to sensitive crops. Clean the entire sprayer system, not just the tank. Operate the pump and flush cleaning solution through all hoses, strainers, screens, nozzles, and the boom. Remove the nozzles, screens, and strainers and clean them separately in a bucket of cleaning agent and water.

Storage: Avoid exposure to direct sunlight and store in a cool dry place for a 2 year shelf life.
